RESPONSE TO RESTRICTION REQUIREMENT

This response is submitted in reply to the Office action, dated May 31, 2002, for which a one-month period for reply was set, making a response due on or before June 30, 2002.

REMARKS

In response to the request to elect a species of a generic invention, Applicants provisionally elect species (a) diabetic lower limb ischemic disease. As noted in the Office action on page 2, the claims will be restricted only if no generic claim is finally held to be allowable.

Applicants respectfully disagree with the requirement to elect a single species. Applicants note that the International Searching Authority found unity of invention, as evidenced by the International Search Report, a copy of which is attached as Exhibit A. Moreover, Applicants submit that the presently pending claims are all directed to the treatment of diabetic ischemia (a single conceptual disorder) and the location of the diabetes-related ischemia (e.g., lower limb, nerve or myocardium) is *not* sufficient to warrant separation into species, nor to require a division of the claims.
